## M.D. BATTLE RIVER COUNCIL MINUTES

The Council of the Municipal District of Battle River No. 423 met in the Municipal Office, Irma, Alberta, with all members present.

Minutes of July 11th were read and on motion of Mr. Burton were accepted as read.

Letter read from the Director of Surveys.

Moved by Mr. Smallwood that the Secretary write the Department of Public Works re the S. W. 8-44-9 With stating that this road has been surveyed, quoting plan No. and kind of road allowance rendered useless by this diversion. Cd.

Moved by Mr. Burton that the motion made by Mr. Burrell on the minutes of July 11th requesting the Secretary to forward to the Settler Municipal District the account of \$65.00 for the transportation of Mrs. Rosie Gains and family from Wainwright to Settler for payment be rescinded and the Secretary forward to the Secretary of the town of Settler an itemized statement of \$42.75 for transporting this family to Settler for payment. Cd.

Moved by Mr. Burton that Mr. Fischer and the Reeve be appointed as a committee to investigate the condition of Current Taxes and Seed Grain loans with power to Act. Cd. Moved by Mr. Burrell that the Secretary write the Soldiers Settlement Board, Edmonton re the N. W. 15-44-9 With that this land is rented to D. West on a Cash Basis and as a Revenue is derived from this land this Municipality will look to them for Taxes on same. Cd.

Moved by Mr. Santee that that part of motion of July 9th reading A. C. Archibald \$50.00 Road Diversion thru the S. W. 26-46-9 With be passed and paid, be rescinded and Check No. 170 be cancelled. Cd.

Moved by Mr. Burton that the amount of \$50.00 be offered to the owner of the S. W. 26-46-9 With for diversion through the said land according to clause 102 Chapter 11 M.D. Act 1926. Cd.

Moved by Mr. Burrell that Messrs Smallwood and Fischer be appointed a committee to investigate the condition of Indigents in this district. Cd.

Moved by Mr. Santee that the two motions of June 11th and July 9th regarding the sale of the North half and the S. W. quarter 20-44-9 With be rescinded. Cd.

Moved by Mr. Burton that under the Tax Recovery Act 1929 the following land will be offered for Sale by Public Auction at the Municipal Office at Irma, Alberta, on Tuesday, September 10th, 1929 at 2 p.m.: S. 20, 44, 9 W4th; N.W. 20, 44, 9 W4th and the S.W. 20, 44, 9 W4th. The above lands will be offered subject to

a reserve bid and the reservations contained in the Existing Certificate of Title. Redemption may be affected by payment of the full amount of arrears of Taxes and Costs at any time prior to the sale. Terms of the sale will be 20 per cent. Cash and the balance in three equal instalments at 8 per cent. interest per annum. Cd.

Moved by Mr. Burton that the Reeve act as Auctioneer at the sale. Carried.

Moved by Mr. Santee that the Reeve and Treasurer shall be authorized to borrow from the Bank of Montreal, Irma, Alta., the sum of (\$5,000). Five Thousand Dollars for Municipal purposes as per their Form No. L. F. 68 Rev. Nov. 1925. Cd.

Moved by Mr. Santee that the Secretary forward the District Engineer of Canadian National Railways, Edmonton, Alta., a copy of the Blue print of Road Diversion to the Railway Crossing between Sec. 18-45-7 With and Sec. 13-45-8 With asking to give this matter their prompt attention. Carried.

Moved by Mr. Santee that this Council order from the Richardson Road Machinery Co., at Saskatoon, one 12in. x 12 ft. culvert with two Couplings, same to be delivered at Fabyan, Alta., for the use in Division 1. Cd.

Moved by Mr. Santee that the account of W. E. Washburn for \$23.80 Wire and Staples and account of Geo. Stagshaug for \$21.00 Labor on the S. E. quarter 35, 45, 7 W4th be dishonored. Cd.

Moved by Mr. Burton that the following bills be passed and paid.

Wm. Santee—Council fees and mileage ..... \$75.00

## NEWS ITEMS FROM KINSELLA

Mr. and Mrs. William Steele and family of Clark Manor spent Sunday afternoon with Mr. and Mrs. William Anderson.

Messrs. Frank and E. C. Williams motored to Edmonton on Sunday, they returned Tuesday evening.

Mr. J. Ansell of Wainwright spent Sunday at his home here.

Miss Mae Murray has resigned her position as clerk at Mr. Ferries. Miss Davidson of Edmonton is the new clerk.

There were three cars that left here last Friday to attend the W. I. Convention at Galahad. Those going were Mrs. Scott, Mrs. Smith, Mrs. E. Williams, Mrs. Johnson, Mrs. Kemp, Mrs. Turnbull, Mrs. Anderson, Mrs. Murray and Mrs. Watson. Those who furnished the cars were, Messrs. Johnson, Scott and Watson. They report a very pleasant day.

Mrs. Anderson and son of Edmonton who have been spending the past few weeks with Mr. McKee returned home Saturday evening.

The next Ladies A.S.U. meeting will be held in the church. It will be a kitchen show for the basement.

**THE FORD IN EUROPE**

In the recent Copenhagen-Paris-Copenhagen 1440 mile road race, sponsored by the Danish Motor Union and the well known Danish newspaper Politiken, the Ford Model A car again demonstrated to Europe its speed, endurance and durability by winning first and second places against a wide field of international competition.

Operated on the same basis as the English tourist trophy races, the 1440 mile Danish road classic is noted for hard going and stringent regulations. This fact is rather borne out by the results which show that only fifty per cent. of the competitors finished the course.

"We encountered the most formidable difficulties," stated Mr. Tholstrup, of Roskilde, Denmark, pilot of the winning Ford sedan, "the weather before and during the race was so bad that great stretches of road were deeply rutted and, for many miles, washouts and slides made them impassable. On this account, many detours which had not been counted in the original run, had to be negotiated; for hours the cars had to be driven through fields and meadow lands. This hard going was bad enough in the daylight but when night fell, driving became extremely hazardous; dense ground fogs rose and considerably cut down our field of vision; I have no doubt that weather conditions alone were responsible for many failures."

Reporting upon the performance of his own car, Mr. Tholstrup said, "We just went, that's all. No matter how deep the ruts and soggy the field surfaces, we just ploughed thru with comparative ease; we seemed to fly over the better roads. The only trouble I experienced throughout the whole of this race was two punctures. We had no mechanical trouble whatsoever."

Details of the trip, received at East Windsor, disclose the fact that the winning car had already 23,000 miles to its credit before entering the race. Neither was it outfitted specially for the run. It was, in every respect, a standard factory model.

"My car is as good as ever," remarked Mr. Tholstrup after the race, "I'm ready to drive to Paris and back again without even examining it."

**NOTICE**

As I have purchased the Jarroo Hotel from Jim K. Wong, all debts against the Jarroo Hotel should be presented to me at once. I will not be responsible for any debts after August 31st.

Signed Lee Him

C. M. Steele — \$108.00.  
H. Kasten — \$164.75.  
P. J. Harvey — \$171.86, \$66.10, \$384.96, \$300.24.  
Carl Larson — \$488.75, \$147.50.  
Wm. Walker — \$147.00.  
C. M. Steele — \$655.25, \$232.50, \$49.50, \$208.50.  
A. L. Deitrich — \$172.92, \$220.70, \$22.50, \$43.62, \$21.80, \$204.00, \$8.00, \$44.30.  
I. E. Woods — \$235.00, \$198.50, \$198.50, \$74.00.

Moved by Mr. Vesey that this council adjourn. Cd.

## CHURCH NOTICES AND ACTIVITIES

**CHURCH NOTICES**

As the Rev. Mr. Geeson is in Edmonton attending the School of Religion which opened last Tuesday and continues till next Wednesday all United Church appointments are closed for Sunday, August 25th. Sunday Schools will be held as usual.

The Women's Missionary Society will hold their regular meeting and anniversary picnic on Mrs. Locke's lawn Thursday, August 22nd. All ladies are invited and the men are especially invited to come to supper.

## NEWS ITEMS FROM JARROO

On Friday evening a social was held in the hall to bid farewell to Mr. and Mrs. Geo. Fisher who are leaving town for Lethbridge, where Mr. Fisher has accepted a position with the Rawleigh Co.

Mrs. Fisher has been organist in the church and Sunday School for three years and will be greatly missed. In appreciation of the work she has done a tray and tea set were presented to her. Rev. Mr. McNeil made the presentation and expressed our loss in a few well chosen words. Mrs. Fisher replied and thanked everyone very nicely for the gift and social time. Mr. and Mrs. Fisher and family left by motor on Tuesday morning.

Mrs. P. R. Mobry is moving into the home formerly occupied by Mr. Fisher, which she has purchased.

Miss Nan and Hettie Kennedy of Edmonton are visiting at their sister's Mrs. Jenkins.

Miss Edna Peet is spending the week in Edmonton.

Mr. and Mrs. G. Matthews and Mr. and Mrs. Ray Moore and children have returned after a six weeks motor trip to California. We are pleased to know Mr. Moore is much improved in health.

Miss Marion Matthews is visiting with her sister Mrs. Richardson in Killam.

Mr. and Mrs. McNeil are spending the week in Edmonton.

Mr. and Mrs. Grassey who have been visiting Mr. and Mrs. Waite, left for their home in Neepawa, Manitoba, on Monday.

Mr. and Mrs. A. Christensen have returned after a motor trip to Tacoma, Wash., where they visited Mrs. Christensen's parents.

On Monday evening a well attended meeting of the Community Club was held in the Hall. It was decided to register the club under the name of the Jarroo Community Club.

An old time dance was planned for Friday evening, Aug. 30. There will be old time music and dances and also some of the later dances. Supper will be served in the old time way in the hall and we hope to see a real big crowd. The proceeds will go toward the hall.

The Club also divided into two teams, captained by Mr. Bamsey and Mrs. Barton for a membership drive. Everyone in the district will be asked to join the Club. The fee being one dollar a year. We hope everyone will join with us or give the dollar anyway, as the hall needs more fixing before it will be warm enough for use in the winter, and we are anxious to have it done before cold weather.

The annual meeting of the Club will be held on October 7th.

Myrtle Peet left on Thursday for Prince George, B. C. to spend the winter.

## ANOTHER ALBERTA TOWN SUFFERS FIRE LOSS

Lloydminster, on the border of Alberta and Saskatchewan suffered a heavy fire loss early Monday morning when almost the entire business section was destroyed at an estimated loss of over a million dollars. A heavy wind was blowing which spread the flames rapidly and it was only by supernatural efforts that the residential section was saved.

## MUNICIPAL DISTRICT OF BATTLE RIVER No. 423 Notice

Take notice that under the Tax Recovery Act, 1929, the following lands will be offered for sale by Public Auction at the Municipal Office at Irma, Alberta on Tuesday, September 10th, 1929 at 2 P.M.

N. E. of Sec. 20-44-9-with  
N. W. of Sec. 20-44-9-with  
S. W. of Sec. 20-44-9-with

The above lands will be offered subject to a sealed reserve bid and the reservations contained in the existing certificate of Title.

Redemption may be effected by payment of the full amount of arrears of Taxes and costs at any time prior to sale.

Terms of the Sale will be 20 per cent cash and the balance in 3 equal instalments at 8 per cent. interest per annum.

Dated at Irma, Alberta, this 20th day of July, 1929.

R. J. TATE, Sec.-Treas.

## SOME GOOD IDEAS

When the men come in with a big pile of grain bags to be mended try this method. Put your irons on the stove to heat and make a thin paste of flour and water. Turn the bags upside out and shake them well to remove all grain. Slip a piece of board, about 14 by 18 inches in a convenient size, in the bag under the hole to be mended and smear the patch well with the paste and put it paste down over the hole, and iron down with a hot iron. If you put the paste on carefully, being sure you have it well out of the edges, of the patch, and your iron is hot, the patch will stay there just as well as if you sewed it.

I packed eggs in three ways last summer—in waterglass, in salt and in sand. The necessity of a watertight container is my objection against using waterglass. Never again will I pack eggs in salt as the salt hardens and the task of getting the eggs loose without breaking them was a very difficult one. I found dry sand very good. I used a box for the packing and there was no trouble in getting the eggs out. They packed splendidly.

If you have a family of boys and wish to train them to help with the work, try this plan. Take a piece of paper for each, write his name at the top and mark down the work you wish each child to do. It will surprise you how much more willingly and quickly they will work.

When the house dresses begin to tear or fade I cut out both sleeves, leaving very large armholes. Then I hem the armholes on the machine. The result is a sleeveless overall dress which I use when gardening or miking. It is easy to slip on and off.

When circular pillow cases become worn thin where the head rests, I cut off the bottom seam and fold so that the worn parts become the folded edges of the pillow cases. I then sew the bottom seam. This method prolongs the life of the pillow case.

A perforated mixing spoon is useful for putting eggs into boiling water and lifting them out again. With a tool of this kind no water is taken out. It is also convenient for removing fruit or vegetables from liquid.

I use left over pieces of linoleum to make mats. I put these on the floor where the most wear comes, as for example at the front of the table or stove. These mats lengthen the age of the linoleum on the kitchen floor.

Unframed pictures or maps in constant use soon become torn. A good plan is to back these with cheese cloth, muslin or some other light material. Use a thin flour paste for glue and make sure that it is entirely free from lumps.

I save the hook end of old garters and sew them on hot pot-lifters. I find these hooks much handier than a loop of tape to hang the holders up with.

Try soaking ham overnight in milk. This makes it sweet and tender after it has been cooked. I find a small crock is very handy for soaking ham in this way.

An old and discarded bedspread can be utilized by cutting up into 10 or 12 inch squares. These squares hemmed make very good wash cloths.

When making juicy pies I make the top crust one inch larger than the bottom crust and fold it under the bottom crust. This prevents the filling from running over.

## MARKING ALBERTA HIGHWAYS AND TRAILS

J. A. McNeill, manager of the northern division of the Alberta Motor Association, was in town Tuesday. The motor association has undertaken to mark 2,000 miles of the motor roads of Alberta north of Red Deer.

The highway from Edmonton, Viking, Wainwright, Chauvin, south to the Green Trail north of Hayter is completely marked. Every turn is plainly marked R or L, as well as every cross road with marking with a straight ahead sign. This highway is now in good condition and it is the opinion of Mr. McNeill that there will be a considerable increase in tourist traffic along this line.

The Green highway from Wetaskiwin to Macklin as well as the Black Trail from Edmonton to Athabasca have been completed. All the main trunk roads as well as many of the secondary cross roads will be marked in detail before the 2,000 miles are completed.

Let the much needed good work go on.

## "In Selling Position"

Alberta Wheat Pool members should appreciate what it means to the Central Selling Agency to have Pool wheat in "a selling position."

To make the best sales Pool wheat should be in a position where it is instantly available, and where long and troublesome delays are not incurred.

When Pool wheat is in Pool Elevators the Selling Agency can depend upon it being directed wherever it is wanted. For that reason, if for no other, Pool wheat should be delivered to Pool elevators.

Besides this, Pool elevators give Pool members an assurance of fair treatment to an extent never known in the days when there was no Wheat Pool.

**"You can best aid your Selling Agency and your own elevator system by delivering your wheat to Pool elevators."**

Do not be tempted by the price of cheap teas. Only fine teas will give continued enjoyment

## Culpable Negligence

It is becoming, to an ever increasing extent, one of the responsibilities of governmental authorities to protect people against themselves, not only for their own sake, but for the sake of others whom, in one way or another, the former are endangering. One of the latest developments in this direction is joint action by the Dominion, Provincial and municipal authorities to lessen the possibility of accidents at level railway crossings. Such crossings are always dangerous, but with the advent of the motor car, and the speed mania of reckless drivers, the death and accident toll has mounted alarmingly.

In nearly one thousand accident cases reported to the Board of Railway Commissioners during the past year, there was danger of loss of life or damage to property because of negligence at highway-railway level crossings. Of these accidents 368 were reported on the lines of the Canadian National system, and railway officials have carefully classified these. It was found that more than forty per cent. of the accidents were caused by some form of downright negligence on the part of the motorist.

Of the huge total of accidents, no less than 325 were cases where vehicles broke or damaged crossing gates which had been lowered; 23 where drivers ignored signals and drove right through gates; 36 cases where drivers passed right ahead under gates which were in process of being raised or lowered; seven cases of driving on to crossings opposite gate which had been lowered; five cases where drivers under the influence of liquor crashed into gates; while three accidents were due to pedestrians climbing over or under gates.

In other words, all these accidents were the result of a wilful disregard of the means of protection provided by the railways. But in their insane desire for speed motorists were responsible for a large number of accidents which were the outcome of what is classified as "inexplicable negligence." Some of the almost incredible performances of careless and reckless drivers are listed as follows:

Forty-four motorists drove into the sides of moving trains. Thirty-eight drove into the sides of standing trains. One driver parked on the railway lines while he had a sleep. One tried to drive between two railway cars while switching. He was unsuccessful.

Twelve parked on or too near the railway tracks. Seven went for a drive along the railway tracks—they met express trains.

One driver left his car on the tracks to search for something he had dropped on the road. When he returned there was nothing left of the car. One driver stopped on the railway tracks to adjust his load.

Eleven found too late that their brakes needed re-lining. This amazing record shows that not only are many accidents at crossings due to sheer negligence and in no way excusable, but they also serve to indicate the nature of the problem of "educating" drivers of motor cars guilty of such insane conduct. Warning signs and even physical barriers such as crossing gates are no sure guarantee against accidents due to such carelessness.

There appears to be but two methods of putting an end to such accidents. One is to do away with level highway-crossings altogether by carrying highways either over or under the railway tracks. This is a highly expensive business, and is not possible in a country of such immense distances as Canada. It can be done at crossings in all urban centres and at points where traffic is exceptionally heavy, and to this task the Federal Government through the Board of Railway Commissioners, working in co-operation with Provincial Governments and municipal authorities, has decided to bend its energies, the cost of obliterating these level crossings being distributed among these several governmental bodies.

The second course is to license all drivers of motor cars and to make it an offence for anyone to drive a car unless he or she has such a licence, and to immediately cancel the licence of any person found guilty of negligence, carelessness, and recklessness in handling a car. Such persons are a danger not only to themselves, but to the public at large, and in the public interest should be denied the right to drive such a potential engine of destruction on the public highways as the modern powerful motor car.

## New Midget Auto

Will Be Sold Through Mail Order Houses For \$200

The New York Times says negotiations are under way for the large scale production of the new "baby" auto which would be sold through the mail order houses for \$200.

The car is the invention of James B. Martin, of Garden City, N.Y.

The feature of the car is that it has no axles in the usual sense of the word, each wheel being independently mounted in the reinforced body. Rubber "aviator cord" is used in the

suspension of each wheel instead of a spring.

The new car has a wheel base of sixty inches, compared with 102 inch wheel base of the smallest car now being produced in the United States. Mr. Martin said his invention will do 50 miles on a gallon of gasoline.

He declared he planned to have it shipped in a weather proof packing case with a hinged door which may be used as a garage.

## Land Of Living Skeletons

Returned Traveller Tells Of Conditions In Famine Ridden District In African Congo

A land of living skeletons where those who did not die of hunger fell victims of disease or were torn to pieces by wild animals was described by Commander Edward P. Thompson, U.S.N., retired, on his arrival in New York, after spending six years in the famine-ridden Ruanda, district of the Belgian Congo, he said.

The living were too weak to care for the dead, and everywhere corpses were left lying beside the roads. Those survivors who had sufficient strength to gather up their belongings have fled to adjacent districts.

Commander Thompson blamed continued lack of rain and under cultivation of the small farms by the Bahutu tribe for the three-year famine.

A woman of Perth, Australia, has left her entire estate of \$10,000 to reduce Great Britain's national debt.

Keep Minard's Liniment always handy.

## Receives New Honor

King George Confers Barony On Sir Robert Baden-Powell

King George has conferred a barony on Sir Robert Baden-Powell entitling him to sit in the House of Lords.

Lieutenant-General Sir Robert Baden-Powell founded the organization of Boy Scouts and Girl Guides in 1908, after he had had a distinguished military career in India, Afghanistan and South Africa. He received various citations and decorations for his war services and many others came to him for his work with the Boy Scouts.

## NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than the shattered nervous system. And often, unfortunately, but little sympathy is shown for the sufferer from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper, when it is not their fault. Their poor health is the cause. The tired, over-busy wife and mother, whose household cares have worn her thin, the breadwinner whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run-down. Their nerves, like all bodily organs, need rich, red blood. In all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how this medicine ended her nervous troubles. She says: "I have suffered from nervousness and dizzy spells, and hundreds and one things which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. I found the use of this medicine I found my nerves grew steadier, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young."

You can get these pills through any medicine dealer or by mail at \$6 a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Life Of Motor Cars

The average life of an automobile is stated to be seven years, although not many persons run their cars that long. The auto plainly is not in the class with horse-drawn vehicles which it displaced, as regards length of years. The old joggles and cabs frequently were longer-lived than their owners, and their maintenance cost was little more than the price of axle-grease. Montreal Gazette.

**The Many-Purpose Oil.** Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pain of rheumatism and sciatica, sore throat and chest, horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

## Improving the Airplane

The U.S. Bureau of Standards, has developed a new sound-proof aeroplane cabin which it is believed will eliminate one of the drawbacks to increased passenger transportation—the roar of the motor.

## Must Tell the World

British Manufacturers Can Sell Goods Only By Advertising

British manufacturers are losing trade in Canada and elsewhere not because their goods are inferior or because their prices are too high, but because they hide their light under a bushel. Those manufacturers—and there are still too many of them in England—who think that when they have made a good article and quoted a fair price for it, they can wait for buyers to come to them are laboring under a fatal delusion.

Our potential customers in Canada and other Dominions cannot be expected to search out the British firms that might supply their needs. The mountain will not come to Mahomet, but Mahomet must go to the mountain. In other words, our would-be exporters need to make their goods widely known before they can sell them, and any lingering belief that advertisement is a luxury instead of a necessity must be eradicated from the British business mind.

## May Be Good Prophet

President Of Tractor Organization Predicts Chain Farms

Milton W. Anderson, the president of a big tractor organization, predicts the coming of chain farms as the logical complement of chain groceries and other stores. Come to think of it, Mr. Anderson may be a good prophet.

Rightly or wrongly, farmers claim farming does not pay. Some say it does, but more say it doesn't. Perhaps it is a matter of habit with farmers to run down farming. There is always something wrong about crops. If it isn't one thing it is another. And, of course they never admit that they get the prices they ought to.

They try co-operative marketing and pools, and still "farming doesn't pay." The price of implements is too high and so on.

After all, farming is a business, just as running a store or a factory is a business. But farmers are notoriously unbusinesslike. They conduct their affairs in a way that would make a dyed-in-the-wool business executive tear his hair with anxiety.

The time may come soon when farms are linked up as chain stores are linked up. There will be a central organization, financed by big business men. Individual farmers will give up running their own farms and merely be the branch managers of farms owned by the chain.

They will have to run the farm, not as they have been used to running it, according to their own ideas, but according to the scientifically devised methods of the proprietors. The owners will buy machinery, stock and seed in vast quantities. They will sell agricultural produce the same way. The farm manager will draw a straight salary and be relieved of his individual worries. Perhaps he will get a bonus from grateful directors.

It is a striking picture of the future. And quite a feasible one. —St. Thomas Times-Journal.

## British Empire Games

E. W. Beatty, C.P.R. President, To Act As Chairman

E. W. Beatty, C.P.R. president of the Canadian Pacific Railway, has consented to act as chairman of the British Empire Games Committee of the Amateur Athletic Union of Canada; it was announced recently by Professor T. R. Louden, president of the Union. The meet will be held in Hamilton, Ont., in August, 1930.

Among members of the games committee are: Joe Louden, John Leale, general secretary of the A.A.U. of C., and the following chairmen of the various A.A.U. of C. branches: Alberta branch, C. B. Cheisman, Cardston; British Columbia, J. R. Davison, Vancouver; Saskatchewan, J. W. Hamilton, Regina. James A. Richardson, of Winnipeg, and W. B. Blake Wilson, Vancouver, are members of the general committee.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work sure and promptly.

## Must Tell the World

British Manufacturers Can Sell Goods Only By Advertising

British manufacturers are losing trade in Canada and elsewhere not because their goods are inferior or because their prices are too high, but because they hide their light under a bushel. Those manufacturers—and there are still too many of them in England—who think that when they have made a good article and quoted a fair price for it, they can wait for buyers to come to them are laboring under a fatal delusion.

Our potential customers in Canada and other Dominions cannot be expected to search out the British firms that might supply their needs. The mountain will not come to Mahomet, but Mahomet must go to the mountain. In other words, our would-be exporters need to make their goods widely known before they can sell them, and any lingering belief that advertisement is a luxury instead of a necessity must be eradicated from the British business mind.

## Noted Speakers Will Be Heard

Will Deliver Addresses At Annual Convention Of Canadian Chamber Of Commerce

Right Hon. L. C. M. S. Amery, Hon. R. E. Bennett and E. W. Beatty will be among the speakers to address delegates to the annual convention, Canadian Chamber of Commerce, at Calgary and Edmonton, September 11, 12 and 13. All speakers will conform to the general theme of "Our Canadian Economic Partnership."

Mr. Amery will speak on the British Empire's share in the partnership; Mr. Bennett on confederation as a partnership; and Mr. Beatty on the role of transportation in economic partnership.

Other speakers will include Premier J. E. Brownlee, of Alberta; Hon. S. E. Tolmie, premier of British Columbia; Hon. Battersworth, president of the United States Chamber of Commerce; Sir A. W. Buchanan, owner of the Lethbridge Herald, who will discuss the share which agriculture takes; R. J. Hutchings, president of the Canadian Manufacturers' Association; H. W. Wood, president of the United Farmers of Alberta; Senator Gibson Robbison, John W. Daffoe, editor of the Manitoba Free Press.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

"Why do you pay so many visits but never ask anybody to your house?"

"You see, when I pay a visit I can go when I like, but when people visit me, I have to wait until they feel like going."

An adding machine was built in 1915 and exhibited at the Panama Exposition that had a capacity of 10 columns or within one unit of ten duoducillions.

## Calgary Aero Club

More Than Fifty Local Fliers Have Graduated Since Last September

With the announcement the other day that three more Calgary airmen had secured pilot's licenses, under the supervision of Inspector H. G. Ingram, Inspector of Civil Aviation for Western Canada, the number of local fliers who have graduated since flying began here last September has more than passed the half century mark, so it was stated by officials of the Calgary Aero Club and the Great Western Airways, Limited.

**Reduced By Asthma.** The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early should by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

## Pigeon Versus Telegraph

A carrier-pigeon has had a race with the telegraph, and has won. The other day two messages were sent to the same destination overseas, one by telegraph and one by pigeon.

The gallant little bird arrived first, beating the telegram by ten minutes.

Freemeter the Poet—Remember sir, poets are born, not made.

Wormmore the Editor—And that's the worst feature of the situation. If they were manufactured they could be prohibited by law.

## High Standard Maintained By Medical Profession Necessary To Retain Confidence of Public

(By Dr. Gordon Baies, General Secretary, Canadian Social Hygiene Council)

Who is a doctor?  
How is that the governments and peoples of every civilized nation in the world single out one group of men—and nowadays, of women too—and say to them: "You are doctors, and in your hands we place our social and individual health. You and you alone may use the hallowed title, 'Doctor of Medicine,' and by virtue of that title, heal the sick and preserve the well."

Perhaps the best answer to that question, is this: Imagine, if you can, the condition that would exist if the medical profession were not so recognized. Suppose that any man who had the laudable ambition to heal his fellow-men of their ills—could without any supervision call himself "Doctor," and begin cutting people up and dosing them with potations of his own concoction. What an epidemic of horrible deaths there would be! How quickly the public's present profound respect for the title "Doctor" would be changed to the deepest distrust!

What, then, is the medical profession, and how does it maintain the high standard that this great public confidence demands? Let us consider what the Province of Ontario expects of a man who would practice medicine. Its requirements are typical of those of the rest of Canada.

To become a medical student, one must first pass his honor matriculation. That takes five years. After that, he must spend another six years at a recognized medical school.

It is hard to adequately suggest, in a sketchy article of this nature, the vast scope of a modern medical curriculum. The neophyte must learn physics, chemistry, biology, physiology, pharmacology, anatomy, histology (involving an understanding of the microscopic structure of the body).

From these basic studies, all of which, where they touch the human being, deal merely with the normal, the student then proceeds to pathology, the study of sickness, in its different aspects, pathological chemistry, bacteriology and immunology, medicine and surgery in all their branches, preventive medicine, hygiene.

It is still harder for the reader to appreciate the vast historical background, the great wealth and richness of meaning of all of those terms, of the tremendous accumulation of knowledge that a would-be doctor must painstakingly acquire. And when he has spent six long years acquiring it, it is then customary for him to spend one or more often two years as an intern in a hospital. So that a youth of nineteen who finishes his honor matric and starts to "go through for a doctor" knows that he will be about 28 before he starts earning anything. And even then, it will take him another five years before he begins to earn more than enough for the ordinary necessities of life.

Which means that a doctor doesn't begin to earn anything to speak of as a rule, till he is thirty-three!

In the meantime, he has spent from six to eight years learning his profession, he has had to master all the old, as well as all the new branches of medicine, he has passed a number of stiff examinations, made extra stiff in order to keep an already crowded profession from becoming over-crowded. (And from this extraordinary severity of examination, the general public is obviously the greatest gainer, since only the more intelligent, reliable students succeed in passing.)

He has spent an absolute minimum of \$1,000 a year for six years, including \$150 tuition, \$100 for books and equipment, which leaves very little for room, board, clothing and incidentals, to say nothing of amusements.

"Please sir, I have just run over your mother-in-law."  
"How much reward are you claiming?"—Gutierrez, Madrid.

W. N. U. 2798

W. A. KINGSLAND  
General Manager, Central Region,  
Canadian National Railways

But in passing through those years of test and trial, and hard work, he has become legitimate heir to all the tested medical knowledge that mankind has ever acquired and saved. The wisdom of long-dead leeches has been poured into him, and he has become greater than any of them, greater by virtue of his greater knowledge, a scientist, able to work by degrees from the known to the unknown.

And for the privileges that society accords the physician it expects, and is almost invariably accorded, a ten-fold return. There is no other division of mankind, with the possible exception of clergymen, that gives away, gratis, more of its time, energy and knowledge than do the doctors.

A doctor does an enormous amount of work for which he is not paid. Common humanity demands that he answer any serious call made upon him, at any hour of the day or night, even if he knows that the patient cannot pay. In a way this is unjust. No one expects the keeper of a grocery store to give away his goods, even though there may be people starving for lack of them. Yet a doctor is expected to do just that, and in urgent cases he does.

In making this concession to the race generally, the doctor becomes the greatest giver of charity in the community. "Noblesse oblige" is to him no idle, elegant phrase, and it is indisputable that the profession bears, collectively, a great burden of healing the indigent, which belongs rightly to the state, just as the feeding of the starving is becoming recognized as a state responsibility.

And so, within the limitations of this short article, I have endeavored to establish the following facts: That every doctor belongs to a profession whose object above all other things is to heal the sick and to prevent sickness; a profession that is constantly improving itself, a profession that has produced men like Koch, Jenner, and Pasteur, whose discoveries have saved the lives of hundreds of thousands, and will save unborn hundreds of millions, a profession whose pride is in efficiency, and whose record is one of service that has been to a larger degree unselfish than that of any other mundane calling.

### Large Co-Operative Turnover

Total Sales Of Agencies In Saskatchewan Reaches High Figures

Total sales of all the larger co-operative agencies in Saskatchewan amounted during 1928 to \$176,640,000. The volume of business transacted by producer co-operatives in Saskatchewan last year were: Saskatchewan Wheat Producers, Limited, \$150,000,000; Co-Operative Creameries, Ltd., \$5,000,000; Livestock Producers, Ltd., \$4,918,000; Co-Op. Trading Associations, \$3,852,000; Municipal Hall Association, \$1,556,000; Poultry Producers, Limited, \$553,000; Registered Seed Growers, Ltd., \$281,000; Canadian Co-Op. Wood Growers, Ltd., Saskatchewan Branch, \$180,000, a grand total of \$176,640,000.

### Manitoba Poultry Marketing

When the Manitoba Co-Operative Poultry Marketing Association, Ltd., began operation in 1922, the first year's shipments totalled five cars of dressed poultry. Last year the association shipped 72 cars of dressed poultry, 10 cars of live poultry, and 135 cars of eggs to markets in Eastern Canada and the United States. The organization now has a membership of over 12,000 farmers and their wives throughout the province of Manitoba.

### Railway Officials

#### Receive Promotion

Important Changes In Personnel Of Operating Department On The Canadian National

Changes of major importance in the personnel of the executive of the operating department of the Canadian National Railways in Western Canada took place on August first, according to a circular issued by Sir Henry Thornton, president, and Mr. J. R. Hungerford, operating vice-president, of the company at Montreal. The changes are as follows:

A. E. Warren, general manager, Central Region, Toronto, to be vice-president of the Western Region, with headquarters at Winnipeg.

W. A. Kingsland, general manager, Western Region, Winnipeg, to be general manager, Central Region, with headquarters at Toronto.

Col. T. A. Hiam to be assistant to the President, with headquarters at Vancouver, to represent the executive in British Columbia, and collaborate with all departments in matters affecting the company's interests.

A. A. Tisdale, assistant to the general manager, Western Region, Winnipeg, to be general manager, Western Region, with headquarters at Winnipeg.

J. R. Cameron, assistant general manager, Western Region, Vancouver, will, at his own request, retire on superannuation after many years of service.

E. T. Chappell, general superintendent of the Saskatchewan District, with headquarters at Saskatoon, to be general superintendent of the British Columbia District, with headquarters at Vancouver.

C. Forrester, superintendent at London, Ontario, to be general superintendent of the Saskatchewan District, with headquarters at Saskatoon.

The appointment of a vice-president in charge of the western region of the company has been under advisement by general headquarters for some time; and it is a step which meets the general desire of the business men of the west. Mr. A. E. Warren needs no introduction to the west. Most of his railroading experience has been acquired west of the great lakes, and following amalgamation in 1922, he was general manager of the Western Region until his transfer to Toronto in 1926, as general manager of the Central Region.

The transfer of Mr. W. A. Kingsland to Toronto as general manager of the Central Region, will be generally regretted, even though the change places him in charge of probably the heaviest traffic section of the system. During the time he has been in the west, he has succeeded in gaining the confidence and friendship of the business men on all parts of the line as well as the loyalty of the entire personnel under his control. Under his guidance the lines of the western region have shown splendid financial results during the past three years, the returns for the last year being the highest in history.

The new general manager of the western region, M. A. A. Tisdale,

A. E. WARREN, C.N.R. Vice-President of Western Region

was born in Mount Vernon, Ont., in 1874, and has been in the service of the Grand Trunk and Canadian National Railways since 1890, having worked his way by sheer ability from an apprentice in the shops at Hamilton, to the position he now holds. He has been in the west since 1909, at which time he was superintendent for the Grand Trunk Pacific at Fort William, from which post he was transferred to Winnipeg as assistant to the vice-president and general manager in 1916.

In the retirement of J. R. Cameron, the company loses the service of one of its oldest and most valuable officers. Mr. Cameron joined the Canadian National Railways as a conductor in 1880, and steadily worked upward through the operating department to the position he is relinquishing at his own request.

Like most of the other executive officers of the company, E. T. Campbell also won his way up the ladder. He has been in the service of the company since 1895, and has seen service in various capacities in Winnipeg, Port Arthur, Rainy River, North Battleford, Vancouver and Saskatoon.

### The Prairie Garden

Shelter Belts Are Essential For Successful Vegetable Growing

The prairie farmer who figures on having a vegetable garden must consider the planting of a shelter belt of trees and shrubs to protect the growing vegetables from the winds. This planting of a shelter belt must necessarily be commenced ahead of the garden operations. A full discussion on this subject appears in Bulletin No. 43, entitled "The Prairie Farmer's Vegetable Garden," which may be had on application to the Publications Branch, Department of Agriculture, Ottawa.

Large trees are objectionable close to the garden, and shrubs and hedges are more suitable close to the growing vegetables.

Every farmer should endeavour to make the farm supply the farm table, and aim to make this supply measure up to the standard of good living. Vegetables play a big part in this living, and they are increasing in popularity every day.

The economic side of the question is also important. In many sections of the west vegetables are expensive and variety necessarily small unless they are home grown.

The farm vegetable garden does not make any great labour demands, does not require special equipment, can be looked after in spare time, and is interesting and profitable.

Figure on that shelter belt, and a vegetable garden.

### Losses From Insects

The Dominion Entomologist, Mr. Arthur Gibson, estimates that in the aggregate insects cost Canada well over \$100,000,000 annually. This is the loss to field crops and to it must be added the loss to forest and shade trees, stored products, etc. While these latter losses are difficult to estimate they easily average over \$50,000,000 a year.

Barley is believed to have originated in Central Asia.

## Investigation By Scientists Is Under Way To Breed New Hardy Fruits For the North

A. A. TISDALE  
General Manager, Western Region,  
Canadian National Railways

### Catch Fish With Radium

Illuminated Hooks Entice Denizens Of the Deep

Science gave fishermen something new to play with when word arrived from Bermuda of successful use there last week of radium as a lure for deep sea fishing.

The radium was used by William Beebe, New York naturalist, as a luminous coating on hooks attached to sounding wires about a mile long, in depths where no daylight exists. The first catch was a squid, a member of the octopus family. It was large enough to fill a fair sized fruit basket.

### UNUSUALLY LOVELY

A charming tub silk in gay print in red and white colouring, so important for summer wardrobe. Its practicality and sportive-air carries one through an entire day. It can be worn to town for shopping, or to the office, and then to keep luncheon engagement at any fashionable restaurant. It is suitable for Country Club, for the beach or week-end party. Style No. 563 with its gracious flaring skirt with soft gathered fullness creating a cascading draped effect at side, and slightly bloused surprise closing bodice, is most fascinating made of flowered chiffon for afternoons. It may be made with the long sleeves or with the sleeves omitted. It is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Printed cotton voile, printed lawn, sheer pastel linen, printed rajah and georgette crepe offer attractive fabrics. Pattern price 25 cents in stamps or coin (cash is preferred). Wrap coin carefully.

### How To Order Patterns

Address—Winnipeg Newspaper Union,

Town .....

Investigation by American scientists is under way to breed new hardy fruits which may grow in Canada's northland. This was disclosed at The Fair, Man., by K. A. Ryerson in charge of the office of foreign plant importation, United States Department of Agriculture.

Mr. Ryerson arrived in town to lead a party up the Hudson Bay line to select plants and fruits for scientific investigation. He will be accompanied by Prof. W. H. Alderman, head of the Horticultural Division of the University of Minnesota, and W. R. Leslie, in charge of the Dominion Experimental Farm at Morden.

The party expects to be gone a month and will take Churchill in their itinerary.

Mr. Ryerson explained the importance of the trip to the fruit growers of the middle western states.

"The climate of that area is such that only hardy fruits and berries can be grown," he explained. "The winters are very cold and the falls are early. To meet these conditions new fruits must be bred by cross pollination and hybridizing. The ideal plant to introduce in the north would be one that can survive the winters of the edge of the Barren Lands, and yet produce fruit," he asserted. "This trip will only be one of investigation and we expect to return here next summer and get a larger number of specimens to use in our pollination work."

### Surveyors Discover Submarine Mountains

Two New Ranges Have Been Located By Echo

Surveyors of the ocean's bed have discovered two new mountain ranges which have accurately mapped and measured says, an article in Pearson's Weekly. All the credit for the discovery is really due to that elusive subject—the echo. Shells that explode on striking a solid substance were fired at the sea bed below. By calculating the time that it took the echo of the explosion to penetrate from the bottom of the sea, the scientists on the vessel above realized that they had discovered a range of mountains capped, not by snow, but hundreds of fathoms of ocean. One of these ranges lies about one hundred miles off the coast of Ecuador and is considerably over five thousand feet in height. The other range of mountains has been discovered some distance to the north of Juan Fernandez, and rises to a height of nearly ten thousand feet!

### Failed To Work

The gentleman's dinner check was three dollars. The gentleman gave the waiter a ten-dollar bill. The waiter brought back the change on a little tray—some bills, some silver, and a small napkin, folded. The gentleman left a tip and was about to depart when he was inspired to count the change. It was a dollar short. He summoned the waiter, who began to conduct a search, which ended with the discovery of two half dollars in the fold of the napkin. This greatly surprised both the gentleman and the waiter.

### To Teach In Arctic

Miss Bessie Quirt, is going to Shingle Point at the mouth of the Mackenzie River on the Arctic coast as a teacher in the first residential school to be opened for Eskimos in Canada. She will be one of a party to leave Toronto. Miss Quirt's home is in Orillia. She expects to stay for five years in the Arctic.

### How Not To Keep Idle

Mayor T. H. Tyson, of Denmark, Tenn., is a busy man. He serves as notary, justice of the peace, road supervisor of this section, farmer, miller, substitute rural mail carrier, a physician of sorts, and as a sideline sells tombstones. He is also chairman of the Sons of Rest.

"John, I am beginning to feel cold."

"Do what I am doing, pull the coverlet up over your chin." Pages Gaies, Yverdon.

## CANADIAN NATIONAL HOTEL FOR SASKATOON

Above is shown a preliminary study of the new hotel which the Canadian National Railways will build in Saskatoon. It will have a minimum of 200 bedrooms as well as specially planned facilities for catering to banquets, conventions and dances. It will be thoroughly modern and fireproof throughout and its handsome design will make it a beautiful as well as useful addition to the most notable of the city's buildings. The architects are John S. Archibald, Montreal, one of Canada's greatest designers, and

John Schofield, architect of the Canadian National Railways, Montreal. Mr. Archibald and Mr. Schofield have collaborated on such outstanding buildings as the recent addition to the Chateau Laurier in Ottawa; the hotels of the Canadian National Railways now under construction at Halifax and Vancouver, as well as on a number of other buildings which are famous throughout the country for the charm of their design.

## New Home For Canada's Oldest University

Cut Shows Assemblage of King's College Buildings. Inset: His Excellency, Viscount Willingdon, Governor General of Canada.

After 127 years of higher educational work in Nova Scotia, King's College, Canada's oldest university, is to have a new home. The above drawing shows the proposed buildings, which will resemble in character Oxford University, to be built as soon as the present campaign has attained its desired objective. King's University stands as the only real monument in Nova Scotia to the United Empire Loyalist pioneers. In 1789 the U. E. L's who had come to the Dominion from New York planted an "acorn" in the establishment at Windsor, Nova Scotia, of King's College. Full University powers were granted in 1862 by Royal Charter, which was the first one received outside of the British Isles. From a dream in the

souls of those pioneer Loyalists King's has reached a recognized and honored place in the Dominion. Many famous Canadians have been Kingmen. Sir James Cockran, Sir Frederick Borden, Judge Thomas Chandler Halliburton (Sam Slick), Basil King, Rev. H. A. Cody, and Canon Allan P. Shaford, are a few of King's products. In 1923 King's took the first step towards a confederation of Maritime Colleges; the College was removed to Halifax and became associated with Dalhousie University. A year ago King's launched a campaign for \$500,000, having received a promise from the Carnegie Corporation of \$600,000 conditional upon the raising of the first amount. Up to date the total pledged in the

Maritime Provinces, Ontario, Quebec and England is \$340,300, and only \$160,000 more is needed. His Excellency, Viscount Willingdon, Governor-General of Canada, has accepted the office of Patron of the Rebuilding and Endowment Fund.

## The Carillon of the Victory Tower

Here they are. The great bells forming the major part of the 53 bells of the Carillon installed in the Victory Tower of the Parliament Buildings at Ottawa from which will sound the peals of the 60th anniversary of Canadian Confederation. They are shown loaded on a steel flat car and just taken from the hold of the Canadian Pacific freighter Balfour which brought them across the Atlantic. The other illustration shows the Great Bourdon of ten tons, the largest bell on this continent and the second largest in the world being only exceeded by the Bourdon at Moscow Cathedral. The third picture shows the S.S. Balfour in which they arrived safely at Montreal.

The upper rim of the Great Bourdon is encircled with maple leaves and embossed upon it is the inscription in English and French: "This Carillon was installed by authority of Parliament to commemorate the Peace of 1918, and to keep in remembrance the service and sacrifice of Canada in the Great War. Anno Domini MCXXVI." Entirely encircling the lower rim is the text: "Glory to God in the Highest, and on earth peace, goodwill towards men. St. Luke's Gospel, Chapter 2, Verse 14."

On Dominion Day, July 1, the Federal Government will "have the air" and the noble peals of the Carillon will be broadcast over the length and breadth of Canada. Further, the Carillon will be relayed so that its call will be heard in all parts of the British Empire and therefore around the world.

## VIKING

The twenty-third annual Viking fair and exhibition was held on August 15th. In spite of cool and windy weather there was a good attendance, and the entries in almost all classes were more numerous than ever.

The horse and cattle classes were good, in fact quite a bit better than for many years. The animals were well fitted in most cases, and showed that there is still some very good stock in the district, including sheep, swine, and all poultry classes.

As was to be expected the vegetable and agricultural products did not make the usual splendid display. The dry weather was the cause of this, nevertheless there were some fine specimens shown.

The ladies work, domestic manufactures and boys and girls work were up to the usual standard. These exhibits were shown at the school house and made a fine display.

There was only one exhibit in the machinery line, W. J. Brown showing a Hart Parr tractor and Nichols and Shepard separator threshing outfit.

There was a variety of sports at the fair, more so really than at the annual sports day July 1st. We have space only to make a brief mention of each, but to say the least every item was thoroughly enjoyed by the crowds.

The Phillips football team won from the Viking team by the score of 2 to 0 in a game that was well played and the players in good condition to give their best.

The basketball contests were also of a high order, four teams playing in the tournament. Ranfurly eliminated the Viking team in the first contest, after which Rosegarland put the skids under the Sedgewick team.

The finals between Rosegarland and Ranfurly which Rosegarland won by the close score of 16 to 17 was one of the best games of basketball ever seen here. As exponents of the basket game, these boys were clever.

The baseball series panned out better than usual. The visiting teams were Merna and Camrose who staged the first game. Camrose got the jump on the Merna aggregation and it was only a question of how big a score they could run up. Merna made a bid in the last couple of innings when they put their pitching ace on the mound, but the rally came too late.

The final evening game between Camrose and Viking developed into one of those free hitting games that the fans like to see. Viking with T. Mix in the box got a good lead on the fast travelling Camrose gang, but they soon fell on Mr. Mix's slants and about the fourth inning manager Slavik waved him to the field and called in young Fitzmaurice to stem the avalanche of hits, which he did for three innings in real big league style. His arm weakened, too, so Benny Richardson was hastened to the mound and with his strong right arm held the Camrosites at bay, with the final score standing 14 to 11 in favor of Viking. Our team showed some of their old baseball ability in this game, and the fans were well satisfied in seeing a good game in every way.

Dr. Jack Wright, Canadian tennis champion, and Willard Crocker, ex-champion gave an exhibition at Veilreville on Sunday afternoon. Several carloads of tennis fans from here motored over to see the champs in action. Two sets of doubles, when the champs paired off with Vegreville players, and two sets of singles were played. Dr. Wright showed that he was easily the champion by defeating Crocker in the two sets of singles. It was estimated that at least a thousand people saw the matches.

Two cars collided at the corner of first avenue and railway street east Tuesday afternoon. The fenders on both cars were bent. One car was driven by Mrs. Burns and the other by Mrs. McFarland of Rodino district.

Mr. and Mrs. Robt. Burns arrived from Okotoks on Tuesday accompanied by Miss Yvonne Havens, of Hanna. They are spending a few days at the home of Mr. and Mrs. Wm. Havens, north of town, parents of Mrs. Burns and Miss Havens. Mr. and Mrs. Burns and Mr. and Mrs. B. Airing, formerly of this place, have recently returned from a motor trip to California.

Mrs. R. Upton and two little daughters are down from Edmonton and are guests at the home of Mr. and Mrs. Basil Hillier.

Miss Anna Streit was successful in passing the elementary pianoforte grade examinations with honors, at Edmonton recently.

Mr. and Mrs. G. Ledingham, and Mrs. Watkins, motored up from Calgary last week, and have been guests at the Steve Jones home for a few days.

Miss Grace McLeod left for Moose Jaw on Saturday after spending a two weeks holiday with her mother Mrs. Nora McLeod.

A. C. Wittmann of Wainwright was a caller in town on Tuesday. Wainwright is making progress in the way of rebuilding since the fire, he stated.

## Island of Orleans—Island of Bacchus

The ship may be as old as the wayside shrine, and only seen tramp where Cartier found the Indian and the vines. The house by the road is more than 250 years old.

"We likewise found quantities of vines such as we had seen nowhere else in the world and which led us to call this the 'Island of Bacchus'." Thus the Saint Malo captain, Cartier, who discovered the Isle of Orleans in 1535 first named it.

Four hundred years. Ships of the adventurer, the explorer, the pioneer, the builder of empire and later, great ships of commerce followed those of Cartier, but the Isle of Bacchus has not known them all and has slept before the portal of the new world for many generations. Not that it has been forgotten, but that the bigger ships have gone by. Industry has not destroyed its charm and today it remains, if not the pristine Isle of Cartier, a piece of old France as translated by those who shortly followed him.

The illustrations above typify the island. "Progress" has been slow. Its people have learned the secret of content. Their tongue, their modes, their

homes are of a century ago. They weave their catalogue; live in homespun. They are blessed with old people. Yet, a short ferry distance away, Quebec with its ramparts, its Chateau Frontenac and its ocean shipping, keeps pace with the advance of the times.

At Ste. Petronille, one of the quaint little villages where wealthy Quebec has its summer homes, an inn has this year been opened, so that it is now possible for the visitor to rest for a while and absorb at leisure the charm and beauty of the forgotten island. But he must be prepared to eat of the good viands of the Habitant and to live a little closer to the homespun. The people of the island will welcome him with good-nature but they have little liking for the modern. They have the secret of content and good-living, on the Island of Bacchus.

The name of the new Inn is La Catalogne and it once was a seigniorial mansion.

## Their Excellencies Make Friends in Banff

On their recent first official tour of the Dominion across to the Pacific Coast, not the least attractive place visited by Viscount Willingdon, Governor-General of Canada, and Lady Willingdon, was Banff, Alberta, in the Canadian Rockies, famous for the beauty of its scenery and the hospitality afforded by the Banff Springs Hotel, one of the most imposing and beautiful buildings of its kind on the North American Continent which is shown lower left.

As a record of their visit the accompanying unusual photographs were taken by kind permission of Their Excellencies. They show Lord and Lady Willingdon each in turn feeding a massive specimen of Buffalo Bull who spends his lordly leisure in the Buffalo Park at Banff, another of

the great attractions of the town. Furred to his hooves, the monster animal, like a survival from some pre-historic period, gently and calmly takes his meals from the hands of his distinguished hosts. Another photograph shows Her Excellency feeding a baby buffalo by hand, while yet another gives us Their Excellencies at a point of vantage on the top of one of the corals at the Banff Park. Lady Willingdon is seated at her ease, but His Lordship has climbed to the very top of the coral and both are enjoying the view from this unusual position. It is safe to assume that Their Excellencies will treasure these photographs as a record of a visit which, although part of an official tour, was not in this case altogether as austere as such tours are apt to be.

Distance, so far as the Canadian Pacific is concerned appears to be measured no longer in miles. Time is the important factor and, at least in respect of package goods, the Canadian Atlantic and Pacific coasts are drawing closer each year. Here, Captain Brintnell is signing for Canadian Pacific express packages to be carried over the airway between Winnipeg and Calgary. For several months the Company has operated an air service between Rimouski, Quebec, Montreal, Ottawa and Toronto. The new link in the air chain was forged under the auspices of Premier Bracken of Manitoba.

Explain it if you can: Take any number in the hundreds and reverse (and subtract the smaller, then reverse the answer and add, and your final figures will always be 1089. For instance reverse 643, thus making 346 to add to 643, subtract the smaller sum which leaves 297. Then reverse 297, making it 792, and add the latter to 297, making a total of 1089.

It will work out the same in any figures in the hundreds.

"Silence gives consent!" a young man remarked here when he asked a deaf and dumb girl for a kiss.

Now is the time of the year to advertise for these stray horses and cattle. A small ad in this paper will help you.

## WORLD HAPPENINGS BRIEFLY TOLD

Two Canadian girls, each 15 years of age, led the 1,600 candidates graduating as Bachelors in letters from the Sorbonne, Paris, France, it has been announced.

An amateur astronomer named Forbes, at Rinderbach, in the environs of Cape Town, has discovered a new comet. Photographs taken, it is reported, confirm its presence.

Karl Auer, Friedrich von Weizsaeck, inventor of the incandescent gas mantle, died recently at his residence at Weizsaeck Castle, in Carinthia. Auer was also the inventor of Auer gas lamps and semaphoric lamps.

The recently proposed flight from Saskatoon to London, England, by the new northern route is being postponed until next June, according to Ben Brodman, of Winnipeg, who is organizer of the venture.

The Prince of Wales received Lieut.-Col. R. M. Blair, Commanding Officer of the Scottish Highlanders, Vancouver, B.C., at St. James's Palace, and congratulated him on his success in winning the King's prize at the recent meet of the National Rifle Association at Bisley.

The name of Wm. Birks, of Montreal, president of the Canadian Chamber of Commerce, has been added to the list of those who will represent Canada at the Kyoto, Japan, conference of the Institute of Pacific Relations. The conference is to be held in October.

The London Daily News says that it learns that the Royal family is somewhat anxious about the health of Prince George, youngest son of the King. The Prince left the navy because of his health and went into the Foreign Office. This was said not to have benefited him, but rather to have caused his present indisposition.

The Canadian boy scouts at the International jamboree are extremely well pleased at a gift of a totem pole from Lord Baden-Powell. The carving on the totem pole represents a red Indian and a beaver together, with a snake intertwining the pole. On the rear are the words "Friendship Jamboree, 1929, R.B.P."

### Could Do Better

A small car collided with a motor-trolley, and as it was clearly the fault of the car driver, he said: "Well, all I can say is that I am sorry." "Oh," said the trolley driver, "is that all you can say?" "Yes." "Well, then, you just listen to me!"

It is said that the newspapers of the United States and Canada annually use sufficient paper to girdle the world with a strip 50 miles wide.

The paper made in one year would make a path a mile wide all the way around the world.

It is the business of a business man to see that his employees attend to his business.

"Why are you crying?"  
"My sister has married and I can't go to school!"  
"But that is not very bad."  
"But don't say she will be better tomorrow."—Lustig, Blaetter, Berlin.

W. N. U. 1708

## Guards Against Gas Explosion

New Invention Works Danger Signal and Fans Away Fumes

After the numerous gas explosions which have occurred recently in London, it was only to be expected that something would be invented to negate this possibility of explosion—a thing of the past. And now we hear of a little device which does away with any danger of gas explosion.

This wonderful little invention is not very impressive to look at, being just a little cylinder shaped, instrument only about seven inches high, which can be fitted wherever there is a possibility of looking. But it only needs the very slightest escape to set this brilliant little sentinel in action, when it works a danger signal, gets in touch with the nearest telephone exchange, and informs those in power of the exact locality of the escape.

Not content with this warning, the instrument little cylinder sets in motion an electric fan to keep away the fumes!

What more could one ask?

## Edison Competition

Boy from Washington State Is Selected To Fight in Foot-steps of Inventor

Wilbur B. Huston, a youth from Port Madison, Wash., was named the winner of the Thomas A. Edison competition for choice of a protégé and follower in the footsteps of the inventor.

The forty-nine contestants, one from each state and the District of Columbia, were first up on the lawn of the Edison house in Llewellyn Park as the announcement was made by Dr. S. W. Stratton, president of the Massachusetts Institute of Technology, who was chairman of the committee of judges.

Dr. Stratton was high in his praise of the boys, who participated in a grueling examination on subjects ranging from morals and ethics to science.

## YOUTHFUL COTTON PRINT

All the smart young folk are making their morning and sports frocks of cotton fabrics, because they are so easily made, and the cost is a mere trifle. Take the model illustrated in red and white printed pique with vivid plaid red bias binding emphasizing scalloped outline of side closing bodice, and edge of kimono sleeves. Why it is made in less than two hours! Only a few seams to join! Style No. 555 comes in sizes 14, 16, 18 and 20 years. Made in plain white pique for tennis, it will appeal quite different. Peach shantung, gingham check in orchid and white, yellow sportswear, linen, orange silk crepe, capricious tones in printed lawn, voile in pink check in green and white, and white angora wool jersey are stunning ideas. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Indians Have Protested Against Bay Railway

York Factory, Braves Say It Will Affect Fur Trade

One of the most unique protests ever made to the building of the Hudson Bay Railway has come from the Indians at York Factory. During a recent two days' talk of the council, which is held annually after treaty payments, the paying agent was officially requested to stop "these people" building a railway to Churchill, because it will affect the fur trade in the York Factory region.

The request was made with all solemnity, and the paying agent was up against quite a problem, according to the version of the affair which has reached The Pas. However, the agent told his red-skin friends that there was little chance of the tracks to Churchill being torn up for their sake, at the same time assuring them that the government would not allow them to starve on account of a fur shortage.

The Indians accepted the agent's promise that he would do all he could for them, but they are far from being pacified about the Bay railway.

The York Factory tribe claims that the white people living at Churchill will stop white furs from coming further down the coast and thereby the chief standby of their fur catch would be cut off.

The protest of the Factory Indians has caused discussion in the north and has again raised the problem of further aid to the Indians in times of stress. The fur catch has been light all over Manitoba in the past few days, and several of the Indian tribes have been in distressing circumstances.

## Voyage To the Antarctic

Famous Vessel Of Capt. Scott, "The Discovery," Starts South Again

Equipped with the latest gear, the good ship "Discovery," famous vessel of Captain Scott, left the East India Company docks at London, England, recently, on another voyage to the Antarctic. Her first destination is Cape Town, where Sir Douglas Mawson, commander of the expedition will join the vessel.

Sponsored by the British, Australian and New Zealand governments, the expedition will continue the scientific investigation of the south polar regions, begun in 1911. Sir Douglas is a noted geologist with much experience in Antarctic exploration he was with Sir Ernest Shackleton in 1907, and led the Australian expedition of 1911-14.

## Predicts Toolless Race

A prediction that man will be without tools in 500 centuries was made at Buffalo, by Dr. Albert Johnston, of Chicago, in a scientific session prior to the opening of the National Convention of Chiropractors. Hard pavements and close fitting shoes are causing the loss of the arch in the foot, and for modern purposes, a solid stump with a single hinge will survive, he said.

## The "Horse" Won

An unknown writer sent a play to Dumas asking the dramatist to collaborate with him. Dumas wrote back in a rage, "How dare you propose to yoke together a horse and an ass?" By return post came the author's reply, "How dare you call me a horse?"

Dumas was so much impressed by this ready wit that he asked for the play again.

Ancient artists obtained their pigments chiefly from the rocks, and earth.

**FREE! FARM AND STOCK ACCOUNT BOOKS**

This valuable book was compiled to advertise CARHARTT OVERALLS—the best farmer's overalls in the world. One former owner wrote that he would not take ten dollars for his book. Write for your today. Hamilton Carhartt, Manufacturers Ltd., Toronto. Over twenty thousand agencies.

## Saved His Pennies

Man Had Nine Bags With 58,850 Pennies To Purchase Car

John Jacobs, a garage owner, staggered into an automobile agency at Bloomfield, N.J., under a burden of nine heavy bags and demanded delivery of a Ford automobile he had ordered previously.

The dealer looked questioning at the nine bags which James heaved up on the counter with a sigh of relief.

"There are 58,850 pennies in those bags," Jacobs said in explanation, "and if you don't believe me, count them. I've been saving those pennies for four years and I said if I ever got enough of them together I'd buy one of your cars."

There were 58,850 pennies in the bags, so Jacobs drove away in the car.

## Recipes For This Week

(By Betty Barclay)

### SHEPHERD'S PIE

On a well-buttered pan place mounds of left-over mashed potato which has been mixed with milk to right consistency; cut left-over meat or fish into small pieces, combine with equal amount of medium cream sauce (2 cups milk, 4 tablespoons butter, 4 tablespoons flour).

If there is any left-over gravy, mix with milk to make right consistency. Add 2 cups left-over meat or fish. Onion, green pepper or pimento may be added for better flavor. Pour around the mounds of mashed potato. Bake in a moderate oven until well browned. Garnish with parsley. If desired, the dish may be lined with potato and filled with cream sauce.

An economy dish is one in which left-overs are used, or that may be prepared with inexpensive ingredients. Try the following. Even though you are wealthy, you will appreciate the flavor:

### POVERTY PUDDING

6 cups whole milk  
1 cup rice  
1 cup sugar  
1 teaspoon salt  
1 teaspoon nutmeg  
1 cup raisins

Put all together in a buttered pan in a moderate oven. Stir frequently at first, and then occasionally. Bake 2 hours. Should be creamy. Better cold than hot.

Host: "Just another wee draple afore ye gang aw, Sandy?"

"Nae, nae," said Sandy, "I tak nae mair. I'm in a new house, and I'm no' very well acquaint wi' the stair."

## Discover New Ocean Trough

Sixth Greatest Submarine Depth Is Found Near Japan

Discovery of a vast ocean trough near Japan, more than five miles deep in one place and ranking as the sixth greatest submarine depth known to man, is welcomed by scientists as shedding increased light on the earthquake history of the region. Centers of earthquake activity are found in the neighborhood of ocean depths. Fissures generally indicate weaknesses in the earth's crust that will give way under conditions of stress and strain.

The trough was found by scientists aboard the "Carnegie," non-magnetic ship of the Carnegie Institute, of Washington, as they were cruising due north from Guam to Yokohama, Japan.

It measured 28,380 feet in depth for a distance of nine miles.

All of the six greatest depths known to man lie in the Pacific ocean. The one that is greater than the newly discovered trough are Mindanao, near the Philippines, 34,220 feet; Tuscara, near Japan, 32,000 feet; Mariana, off Guam, 31,000 feet; Kermadec, off Aldrich deep, 300 miles northeast of New Zealand, 31,000 feet, and Solomon deep, off Solomon Islands, 30,000 feet.

The greatest depth in the Atlantic ocean lies off Porto Rico and measures 27,900 feet.

## Co-Operative Wool Growers

Heavy Consignments Expected This Year From All the Provinces

"This is going to be a heavy consignment year for wool from all provinces," said H. J. Tisdale, of the Canadian Co-Operative Wool Growers, upon his return from an extensive tour of the west. After a month in the principal sheep raising areas Mr. Tisdale estimated that the total of western shipments to the Wool Growers this year will amount to around 2,500,000 pounds, divided as follows:—British Columbia, 400,000; Alberta, 1,500,000; Saskatchewan, 600,000, and Manitoba 300,000 pounds.

## Takakawa Falls Park

The streams which culminate in the famous Takakawa Falls, in Yoho National Park, British Columbia, is fed by the melting waters of the Waputik icefield, which lies upon the summit of the Great Divide. Flowing down the mountain for over half a mile it reaches the precipice that walls the east side of the Yoho Valley. Here it takes an initial leap of 150 feet over the edge, then, gathering itself together, falls in a glorious curtain 1,000 feet down the face of the cliff, and finally tumbles in a magnificent cascade of 500 feet into Yoho River.

The Chinese land covers one-quarter of Asia, from the Pamir mountains to the Pacific, and from Siberia to India.

The barking of a dog can be heard at a height of four miles.

## UNIVERSITY OF MANITOBA WINNIPEG

Offers, among others, the following Courses:

Through its FACULTY OF ARTS AND SCIENCE courses lead to the degrees of B.A. and M.A., and B.Sc., including B.Sc. (Hons.) and the B.Sc. (Hons.) in Agriculture. Through its FACULTY OF ENGINEERING courses leading to the degrees of B.Sc. (E.C.E.), B.Sc. (E.E.), M.Sc., and Ph.D. Through its FACULTY OF MEDICINE courses leading to the degree of M.D. and C.M. Through its FACULTY OF AGRICULTURE AND HOME ECONOMICS courses leading to the degrees of B.S.A. and B.Sc. (Hons.). For full details of courses, a course leading to the degree of LL.B. For terms of admission, details of courses and other information, apply to W. J. SPENCE, Registrar, University of Manitoba, Winnipeg.

## Uses Canadian Hut

King George Often Visits Building Erected By Ex-Servicemen

These Canadian ex-servicemen who were stationed in the vicinity of Windsor Castle during the war and who were responsible for the erection of the Canadian Hut on the edge of the Castle Gardens, learn with satisfaction of the unalloyed delight which is being derived from the structure at present.

The hut owes its origin to the spirit of heroism which afflicted a number of Canadian soldiers who were recuperating from wounds and illness at Windsor. Tired of doing nothing, they conceived the idea of building a log hut on the Castle estate as a reminder of their stay in the district. The idea was approved and the necessary timber placed at their disposal in the forests.

Today the King is using the hut in his recuperation, but Princess Elizabeth has taken possession of it largely as her playroom. In the afternoon she holds imaginary tea parties there, and the King and Queen several times have "casually" called upon her for a cup of tea.

## Recipe For a Delicious Uncooked Salad Dressing

To add tastiness to the salads and green vegetables which are both cheap and healthful at present, the following salad dressing recipe is much prized.

2 eggs beaten until light.  
1 teaspoonful salt.  
1 teaspoonful mustard.  
1 cup vinegar.

1 can Eagle Brand Milk.  
Beat vigorously all the ingredients except vinegar for a few minutes. Add vinegar, stir well and set aside for a few hours to thicken. This dressing will keep for weeks.

## Quebec Had Snow in June

Five different places reported snow in the month of June. The Gouin dam, in the Lake St. Peter region headed the list with a two-inch fall during the 30 days of the month. Thorford Mines ranged to the other extreme, for, in addition to recording traces of snow, it also registered the hottest day of the month, the mercury soaring to 96 degrees on June 20.

## WINDOLITE

MADE IN ENGLAND

## The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has the most beneficial effect on the growth and development of plants and children and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light let strong windows and skylights, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs. while a square yard of glass of ordinary thickness weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight Send for booklet "WINDOLITE"

## The Singing Fool

By HUBERT DAIL  
Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Marcus, the famous Broadway producer, takes a party of four to Blackie Joe's New York night club. Blackie, Blackie's chief comedian and singing waiter, is desperately in love with Molly, the ballad singer, but she scornfully rejects him. Then she goes to the Marcus table and tries to ingratiate herself with the great producer. In a despairing effort to touch Molly's heart, Al goes on the floor and sings a love ballad he has written for her. The song is a sensation and Marcus calls for Al and offers to buy it. Meanwhile Molly has made up to Al, and the latter refuses to sell the song unless Molly is allowed to sing it as a headliner in a Marcus revue. Marcus consents. Grace, the cigarette girl, who is deeply in love with Al, is in the background.

### CHAPTER VIII.

As Al heard Marcus's words he turned quickly and beamed on Molly. He realized he had won. Marcus would not only take the song, but he would make Molly a headliner. Tears of excitement and gratitude filled Molly's eyes. After all, she was not a woman of stone; she did appreciate the gallant stand her singing waiter had made in her behalf. Now Al became aware of a chatter behind him, in front, and all around. The crowd saw him at Marcus's table and refused to be cheated of its encore. The applause was deafening, the customers were pounding on the tables, and their voices came in a monotonous, insistent, rising chant. "We want Al, we want Al, we want Al!"

Al rose and looked around. "You'll have to give them another," said Marcus, smiling. "Have you any more songs ready?"

"Yes, I have others," Al replied. Then he saw Blackie approaching. "Can't you give them something else?"

Al nodded and Blackie advanced to the center of the floor. "Ladies and gentlemen," his powerful voice filled the room. "Mr. Al Stone, the world's premier singing waiter, is going to entertain us with another number of his own composition. I wish to thank you in behalf of Mr. Stone and the club for the rousing reception you have given him."

Again Al advanced to the piano, drew from his pocket a number of ballads, and selected "I've Got a Rainbow Round My Shoulder." Could he put this one over too? Yes, he was sure he could—so quickly is self-confidence born as soon as success is once achieved. And, true to his feeling, he swept through the song to another triumphant conclusion, while Molly's eyes remained fixed on him in rapturous adoration.

Now the night was ended at Blackie Joe's—Marcus and his party had gone and the last of the other customers had vanished too. Waiters were hurriedly piling chairs on tables, scrub-women appeared

with buckets and mops, lights were dimmed.

In a tiny dressing room at the back of the building, Grace, the cigarette girl, had taken the tray from her shoulder, balanced her accounts for the evening and slipped into simple and inexpensive blue serge dress.

Generally Grace had a good natural color, but this morning the pale sunlight, streaming through her dressing room window, revealed her face as dead white. So she put on more rouge than usual, to accentuate the brave front she felt she must assume. Yet as she pulled her tight-fitting little blue velvet hat down over her dark hair and slipped into her coat, these words were beating in her brain.

"He's in love with Molly—and he means to marry her!"

Over and over again the words sounded, like a dirge. And they seemed to take on rhythm, the rhythm of "Always," the love ballad Al had sung to Molly.

Grace heard footsteps in the hallway and turned to confront Blackie Joe. There was good old stout Blackie, gazing at her with kindly eyes. Finally he said:

"How do you feel, little one?"

"Oh—so-so."

She couldn't say she felt splendid; she didn't have the strength to say it, and she knew Blackie wouldn't believe it.

"Listen, Grace," suggested Blackie, "don't take things so hard. I know how you feel toward Al; don't you think I've been watching you and sympathizing with you? But you're beating your head against a stone wall."

"I know it," Grace tried desperately to keep her lips firm. "I've thought things all out—I realized there wasn't a chance for me. But I can't stop loving him just because he loves Molly."

"You can't now, at this moment, maybe," answered Blackie, "but you'll be able to, soon. You're only a kid, and you'll find someone else. I know—I was once a kid myself. With me it was on with a new one and off with the old one every month or two."

"That may be true of you," said Grace, wearily. "I think I know myself. I'll bet you I never love anyone but Al—I know I won't."

Blackie laughed, came over and patted her on the head.

"But don't you tell Al about that," continued Grace, with passionate emphasis. "I don't want him to know how I feel toward him—it would spoil his happiness. And, above all things, I want Al to be happy! He's been wonderful to me—why, he's the best, kindest, best-looking man in the world. Promise me you'll keep mum about me, Blackie!"

"Not a word, kid," said Blackie reassuringly.

"I know how he feels, towards me," Grace went on. "I'm just like a younger sister to him. I wish him all the happiness in the world. I know how he's leaving us. I've lost out forever—and that's that."

"Don't be too sure," Blackie remonstrated.

"What do you mean?"

"I don't mean nothin' except—well, forever's a long time."

Grace rose and moved listlessly toward the door.

"Thanks for taking an interest, Blackie. See you tonight. So long."

"So long," Blackie looked after the sagging little figure that was usually so lithe and vibrant with vitality. He shook his head sadly.

Grace, passing through the serpentine corridors, heard voices—the voices of Al and Molly. They were talking in Molly's dressing room. She did not mean to listen, yet she stopped as she heard Al say enthusiastically:

"We can't lose, Molly. Marcus will sign us up tomorrow and we'll move over to the bright lights and the big money. Then we'll get married. That will be the happiest day of my life, darling!"

"Yes," came Molly's eager voice, "we'll get married and we'll go to the very top. Al, I've always known you had it in you. When I heard you sing tonight I was sure!"

The faint flicker of an unbelieving smile crossed Grace's face, but she made no sound. Then came Molly's voice again:

"We'll leave this dirty hole cold—right away—tomorrow."

Al this, Al paused. Then he remonstrated.

"So soon, Molly? That wouldn't be fair to Blackie. He's done a lot for you and me. It's true I thought of quitting tonight, but that was because I believed you didn't love me. And I couldn't stand the thought of staying. Now it's different; let's give Blackie some notice, be square with him the way he's been with us. After all, he's had faith in both of us."

"Oh, all right," agreed Molly grudgingly, "but I hate this tough place."

Suddenly Grace ran in the other direction, through the corridors, across the deserted cabaret room, down the dark, shabby steps to the sunlit street. Her heart was thumping madly and she wanted to get as far as possible from their voices. Her woman's intuition made her fear for Al's future with Molly; something in the girl's insensitive attitude and words horrified her.

She hurried along the narrow streets toward her lodging house in the Village, several blocks away. Her thoughts were full of Al and her love for him; she realized that if she didn't reach home quickly she would burst out crying on the street.

When she stood in her bleak, shabby, lodging house bedroom and confronted her reflection in a mirror, she cried passionately:

"That girl's no good! She'll never make him happy! And, oh, I love him so! I would have worked so hard to help him!"

(To Be Continued.)

### Queer Ideas Of Sport

Some Men Think Of Wild Life Only As Something To Shoot

Some men have queer ideas of sport.

There was a classic cartoon in "Punch" once, showing two Englishmen looking out of a window, and one of them remarked, "What a lovely day!" "Yes," said the other; "let's go out and shoot something."

Some men have no conception of the beauties of nature. To them trees and mountains are just trees and mountains—not a landscape. To them an animal is just an animal to be shot—not one of the most beautiful examples of the Creator's handiwork.

The Prince of Wales goes in for strenuous sports, but he is not particularly addicted to shooting.

Wild beasts must be kept within reasonable numbers to prevent them assuming dominion over man. But when appeals have to be made to save certain species of animals from extinction, because men kill for killing's sake, it is a telling indictment of those who call themselves "sportsmen."

### As Itemized

The expert had been called in when the factory motor broke down. He took one look, made two taps with a hammer and started it in perfect order. The owner was indignant to get a bill for \$50, and demanded an itemized account. He got this:

Tapping with hammer.....\$ 1.00  
Knowing where to tap.....49.00

### A Poor Housekeeper

Mrs. Smith: Mrs. Brown, lend me a drop of vinegar?

Mrs. Brown: I'm sorry, but I haven't any in the house.

Mrs. Smith: What a bad housekeeper you must be. Whenever I come to borrow a bit of anything, you haven't any.

Spanish applause consists of a peculiar hiss.

Minard's Liniment for Summer Colds.

### Objections To Skyscrapers

Create Traffic Problems By Congestion and Shut Out Air

It is reported that skyscrapers of one hundred and fifty stories are contemplated by American architects, with colored stone which will merge in blues and pinks into the clouds. People looking up at them will scarcely be able to tell where the stone ends and the sky begins.

Chicago is said to be protesting against a building which, with its tower, will attain one hundred stories. The commissioner of buildings only recently revoked a permit to build one of sixty stories.

Skyscrapers are undeniably fine monuments to the skill of architects, but there must be a halt somewhere if city life is not to become intolerable. They have two main objections.

One is that these vast structures house day workers to the number of ten thousand or more, and when they spring up in groups, which they have a habit of doing, they bring together in restricted areas vast numbers of people, sufficient to congest the population of a large city, and create traffic problems that baffle the wit of man to handle.

The second is that the erection of these tremendous walls of stone, reaching to the clouds, shuts out the air and renders the atmosphere enervating to all those whose lot it is to spend their working days within those walls.

There is also a fire menace, although fireproof construction renders that a minor matter.

Still, there was a bad fire two years ago in the top of a skyscraper in New York which was in process of construction at the time, and there is something to be said for the point of view of conservative Old London, whose laws decree that no building shall exceed one hundred feet, because fire equipment is not competent to deal with fires at a greater height, and that human lives are endangered by tall buildings in such circumstances.

### May Never Be Renewed

Harvesters' Excursion To West Is Likely Thing Of The Past

The harvest hands' excursions to the West will be discontinued for this year at least. They may never be renewed. For a series of good crops has brought a rush of labor-saving machinery to the prairies. And the "combines" that thresh as they reap have done away with a tremendous amount of manual labor on the farm.

And if the harvest hands' excursions to the West pass into history the newer generations of Canadians have lost a splendid opportunity to see Canada first—Toronto Telegram.

### SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand, the baby may be beyond all human help before the mother realizes he is ill. Summer is the season of diarrhoea, dysentery, infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, soothe the stomach and keep the baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Okanagan Valley Fruit

Fruit conditions throughout the Okanagan Valley are promising. There has been some drought injury to apples and some hail damage, but on the whole the yield is expected to be a satisfactory one. Onions also are making a good yield.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

### The Man For The Job

The Department Manager: We'll have to fire that new salesman. He's asleep most of the time.

The General Manager: No, don't fire him. Send him up to the clock section. We can use him there, demonstrating alarm clocks on him.

## CORNS

Lift Right Off No Pain

PUTNAM'S

Corn Extractor

Trustworthiness makes reputation! Since the earliest gas engines turned their wheels, Eveready Dry Batteries have been known for their dependable ignition work.

Sealed in metal cases against damp or rain, Eveready Hot-Shots will stand any amount of exposure or rough handling without injury. Buy them for gas engine, tractor or marine motor ignition. Look for the name Eveready on each battery case. If it's not an Eveready, it's not a genuine Hot-Shot.

### Little Helps For This Week

"Whoso trusteth in the Lord, happy is he.—Proverbs xvi. 20.

The child leans on its parent's breast, Leaves there its cares and is at rest; The bird sits singing by its nest.

And tells aloud His trust in God, and so is blest. Neath every cloud.

The heart that trusts forever sings, And feels as light as it had wings; A well of peace within it brings.

Come good or ill, Whatever today, tomorrow brings, It is His will.

He who believes that God's will always must be done prays not when this or that event arises, but ever prays that, more and more, he may come into harmony with it. And out of this constant prayer of the soul that desires not gifts from, but communion with the Giver, there comes a sense of trust.—Francis B. Hornbrooke.

### No Business Depression

Business and Industry Expected To Continue At High Level Throughout the Year

"In the early months of 1929 there were a number of factors in the Canadian business situation, such as the low price of wheat and the tightness of money, which seemed to portend at least a minor recession in business activity for the balance of the year, but, somewhat contrary to general expectations, business and industry have continued at a high level throughout the year, and early summer," say the monthly business review of the Royal Bank of Canada. "With the severe credit strain somewhat relieved and with wheat prices at a much more satisfactory level, there is no question but that prospects for the remainder of the year have shown substantial improvement."

"The confidence that profitable wheat prices will be obtained for the coming crop has done much to offset the gloom caused by the decrease in the size of the crop," says the report.

The trouble with most people who know a little is that they invariably tell a little more.

Minard's Liniment for aching joints.

### New Zealand Butter Trade

Dealers Plan To Supply Canadian Market All Year Round

New Zealand, having obtained a foothold for butter in Canada, is preparing to take further advantage of it. The Auckland Sun states that one of the largest dairy operators, who controls about one-third of the produce shipped from that dominion, is engaged in a scheme to control at least fifty per cent. of the output. It adds that alliances have been formed with Australian houses, that advertising has been arranged in Canada and the United Kingdom and that, "a recently-concluded agreement provides that New Zealand butter will be on the Canadian market all the year round."

NEVER wait to see if a headache will "wear off." Why suffer when there's always Aspirin? The millions of men and women who use it in increasing quantities every year prove that it does relieve such pain. The medical profession pronounces it without effect on the heart, so use it as often as it can spare you any pain. Every druggist always has genuine Aspirin tablets for the prompt relief of a headache, colds, neuralgia, lumbago, etc. Familiarize yourself with the proven directions in every package.

**ASPIRIN**  
Aspirin is a Trade-Mark Registered in Canada

W. N. U. 1798

**Too Much ACID**

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

## Quality Merchandise

## Main Street

Irma Ladies Aid met at the home of Mrs. M. D. Askin, Thursday.

Mrs. W. J. Stuart and daughter of Wainwright are spending a few days with Mrs. McGregor.

The W. A. will meet at the home of Mrs. George Knowles on Tuesday afternoon August 27th at 2.30.

An afternoon tea with a sale of home cooking, also a sale of Aprons, will be held at Mrs. Pryce Jones on Saturday afternoon, September 7th.

Mrs. F. W. Higginson left for Edmonton Thursday evening for a few days visit.

Aletha Knutson had her tonsils removed in the Hardisty hospital the first of the week.

Mrs. Jack, of Clyde, Alta., is visiting with her son Mr. J. Jack of Irma. Miss Irene Archibald is visiting her friend Miss C. Cameron at Sedgewick.

Mrs. Roy Shotts and daughters returned Saturday after an extended visit at their old home at Ottawa, Ont.

Mr. D. Shepard of Rumsey has arrived in Irma to act as ledger keeper in the local bank in place of Mr. H. M. Laird, who has resigned from the service.

Mr. J. W. Wyatt of Edmonton was in Irma last week end looking over the crop conditions. Mr. Wyatt reports crops as good in the Irma district as in many parts of Central Alberta.

Mr. and Mrs. M. M. Cook and family of Calgary are spending their vacation with Mrs. Cook's mother, Mrs. J. H. Elliott. Mr. and Mrs. Cook were former residents of Irma when Mr. Cook was manager of the U.G.G. elevator at Irma some years ago.

Miss Mary E. Price, A.T.C.M. piano teacher, graduate of Mt. Royal College and pupil of Clifford Higgins, Calgary, has opened her studio in Irma. Pupils can be prepared for the Toronto Conservatory examinations. Phone R. 310.

Monday Mr. E. Simmons left for Chipman with an outfit to move several hundred yards of gravel. Mr. Simmons took his truck on which he had his team and a trail loaded with the loading outfit. Mr. Jake Christensen accompanied him to handle the team in loading the gravel.

Cutting is well under way and several machines intend starting threshing the first of the week. Mr. S. Coulman delivered the first load of new wheat in Irma Monday. This was threshed with a combine and graded No. 2 straight. Several machines are at work and the farmers using them think that in a dry season like we have this year they are going to be a big saving in handling the crop.

#### W. C. T. U.

#### BREWERY "TEMPERANCE" LEGISLATION

The Brewery and Distillery are really more consistent in talking "Temperance" than are the Drys.

A liquor organ stated some time ago: "We do not want more people to drink."

When the drinker drinks himself to death, naturally he is then no more a customer. It is easily understood how "the trade" is anxious that more people drink, but not enough (for strictly business reasons) to kill them.

Then, to keep fooling the Drys, and which he does most successfully, J. B. suggests (when action of the Drys is discernible) to the Government, which we must remember, he controls, that some little betterment might be allowed to keep the "Temperance" people quiet for a while. This is given considerable black ink in the daily press and we drys are just simple minded enough to talk as if something had been gained, when just the opposite is the case. With the label removed from the ca's or oil bottle, we are announcing with considerable aplomb that we are "getting there," because the mere will be done before we really know it. Don't you know?—From the Witness.

#### ESSEX WINS COVETED FRENCH TROPHIES

The Ansaldo Trophy, most coveted prize in the annual reliability tour organized by the Motor Club of France, was won this year by an Essex — the Challenger, against the largest field of competitors ever entered. This tour consisted of nine days run of approximately 310 each, with intermediate days in the various French provinces devoted to speed contests, hill climbs, starts with cold motors, brake tests and other events designed to bring out the real qualities of the cars. Other trophies won by Essex in France are the Lyonnaise Cup, the Pyrenean Cup, the Atlantic Cup, the Cup of Brittany and the Cup of the North.

## The Wastebasket

"Is that a popular song she is singing?" asked a hanger at a local social affair. "It was before she began to sing it," was the reply.

A hint for our young folks—nitroglycerine, the most powerful explosive, is also one of the most potent heart stimulants known.

"Why, your heart sounds like a drum beating," said a Jarrow girl to her new fellow. "Yes—er—that's the call to arms," he replied.

"Is it wrong to take a girl out to the dance and shows and not spend money on her?" asked an amateur here of one of our experienced shiks. "No," he replied, "but it's difficult."

A silent majority—two men trying to entertain one woman.

Some people grow old gracefully says a careful observer. Others attempt the new dances.

The women folks are not going to have much trouble in imitating the men until they try to raise a mustache.

Heard at the dance: "Do you remember that you once proposed to me and that I refused you?" "Yes, that was one of my life's most beautiful moments."

Heard among the men at the lodge: "Does your wife play bridge?" "No, she's one of those experts at the game who make hard work of it."

"Dearest, is it a real diamond?" asked a local girl of her Holden fellow when he gave her an engagement ring. "If it ain't," he replied, "I'm being skunk out of a half a dollar."

They say what makes him so silly is because he sleeps under a crazy quilt.

#### It Happened Here.

Susie — "He put his arm around me five times last night."

Rosie — "Some arm."

"Whether marriage is a failure or not, I certainly think that some are more fortunate than others in what they get," said a local man at his wife last week: "Yes, I quite agree with you," she replied, "for instance you got me, but I only got you."

"What is a whiffletree?" asks the Sioux Falls Argus Leader. "What is a thill?" These are familiar words have a strange sound in this most civilized age. For the benefit of the younger generation it may be necessary to explain that whiffletrees and thills are essential parts of a buggy. "Oh, yes, to be sure. And what is a buggy?"

#### CAN'T DISCOURAGE THEM

One of the leading farmers here, Mr. T. Slipper, who farms almost the whole of a quarter section sometimes, found his wheat crop what you might call sparse. One fine morning as the birds were singing sweetly he took out the binder and went two rounds. Something seemed wrong. Thinking perhaps he had got the wrong implement by mistake, he went back and got the mower, and went two more rounds. Still he didn't seem to make contact in some way. So he quit to wait for it to grow shorter. Was he discouraged? No. Did he consider leaving the farm and going to the city? No. What will he do about it? Don't laugh yet, this isn't the right place. Then suddenly a brilliant inspiration came to him; a brain wave, no less. "I have it! I have it!" he cried. "Have what?" asked his wife. Why I'll turn the harrows upside down and drag them backwards over the wheat and shell it out, then disk it in, and it will be already harvested, threshed and sown for another year. Then the birds began to sing again.

Mr. and Mrs. John Lambert Herbert and Thomas Lewis, brothers of Mrs. Lambert, arrived on Wednesday to take up residence on the Hudson Bay farm in Avonlea district.
